Summary

Backend developer with 3+ years of experience building, maintaining, and scaling Ruby on Rails applications. Experienced in writing readable, robust code in Ruby and SQL, with side experience in JavaScript and Python. Graduated from Georgia Institute of Technology and Launch School's Backend Curriculum, where I studied object-oriented programming, networking, and relational databases.

Work Experience

Backend Developer

Ragnarson, Warsaw (Remote) Nov 2022 – Present

- Implemented a learning management system (LMS) for a DevOps educational platform – using Ruby on Rails, Postgres, Redis, and GCP.
- Migrated more than 600k users from a legacy Wordpress application to RoR.
- Refactored key routes, rewriting logic from Ruby to SQL, and improved endpoint P95 performance in one case from ~2000 ms to ~300 ms.
- Monitored, triaged, and resolved issues using New Relic and Sentry APMs.
- Integrated with third-party APIs such as Stripe, Typeform, Vimeo, Firebase (authentication), Mixpanel, and Hubspot.

Junior Backend Developer

Ragnarson, Warsaw (Remote) Jun 2022 – Nov 2022

- Migrated a Rails frontend to VueJS frontend using Vite in an enterprise resource planning (ERP) application.
- Refactored legacy code to reduce dependencies and remove technical debt.

Freelance Web Developer

Warsaw (Remote) May 2021 – Jun 2022

- Cleaning service platform: Maintained and developed features for a Ruby on Rails SaaS product matching cleaning professionals with clients.
- Non-profit mobile app: Implemented RESTful API for an application supporting food access in Georgia, USA.

SEO Analyst

BOLD, Warsaw Apr 2020 – Jan 2021

- Developed scripts in R programming language to analyze web traffic data and guide SEO content generation.

Education

Georgia Institute of Technology, Atlanta – BS in Materials Science & Engineering

Graduated with Honors.

Launch School – Backend Core Curriculum
